Professional Summary

Full-stack developer with strong skills in both frontend and backend technologies, currently working as a **Backend Developer** specializing in Node.js, Express.js, and PostgreSQL. Experienced in building scalable backend architectures, writing clean and maintainable code, and developing production-ready features for real-world applications. Capable of working across the full stack when needed, with hands-on experience in React, Tailwind, and modern UI development. Passionate about problem-solving, automation, and continuous learning.

Professional Experience

Backend Developer, Nubiznez pvt ltd

04/2025 – Present

Coimbatore

- Contributing to backend development for large-scale web and mobile applications.
- Building and maintaining scalable APIs using **Node.js, Express.js, Nest js , and PostgreSQL**.
- Writing clean, modular, and production-ready backend code following best practices.
- Creating technical documentation to support future development and team onboarding.
- Collaborating with frontend and QA teams to ensure smooth integration and feature delivery.

Professional projects

1. TBS – thebusstand.com ☑ Travel Platform (B2C)

- Worked as part of a developer team to build thebusstand.com ☑ mobile and web applications.
- Implemented multiple backend modules including booking history, operator routes, ticket management, and search APIs.
- Optimized both PostgreSQL queries and Sequelize orm , improved API performance for real-time ticketing systems.

2. HR ePayroll Software (B2B + SaaS) – Production Stage

- Developed the entire backend from scratch using a clean layer-based architecture.
- Built complex salary computation logic, PF/ESI calculations, attendance & leave handling.
- Created automatic payslip generation and secure role-based access control (RBAC).
- Implemented structured logging and a global error handler for production stability.

3. Web Scraping Automation (Node.js + Selenium)

- Automated data scraping and processing tasks, reducing manual workload.
- Improved data reliability by validating and transforming scraped data.

Skills

Front-End: HTML | CSS | Bootstrap | Tailwind CSS | React JS

Languages: JavaScript | TypeScript | Python

Back-end: Node.js | Express.js | NestJs | Flask | Fast Api

Database: MySql | Mongo DB | PostgreSql | MsSql | Sequelize ORM

Version Control: Git | GitHub

Soft Skills: Attention to Detail | Continuous Learning

Personal Development Projects

- **Portfolio Website**

Technologies : React, Tailwind CSS, Flask

Developed a full-stack portfolio website with a dynamic backend, enabling seamless project showcasing and contact management. Ensured a responsive and visually engaging UI for an optimal user experience.

- **App Store**

Technologies : React, Bootstrap, API Integration

Developed an interactive App Store featuring three dynamic apps :

- **Weather App** : Fetch real-time weather data and display current conditions.
- **To-Do List** : Add and delete tasks without saving data.
- **Quiz Game** : Display trivia questions with multiple-choice answers and show the score.

- **Web Development Projects**

Technologies : HTML, CSS, Bootstrap, JavaScript

- **VJ Siddhu Vlogs Website (YouTube Clone)** – Responsive video streaming site with custom media queries.
- **Landing Page for E-Learning Company** – Interactive UI for better user engagement.
- **Netflix Clone** – Built a video streaming platform replicating the Netflix interface
- **Event Management Website** – Feature-rich platform with animations & event booking
